

DNA Microarray Printing Workshop

Offered by the Delaware Biotechnology Institute
Microarray Core Facility

January 18-19, 2006

Delaware Biotechnology Institute
15 Innovation Way, Newark, DE

Register today:

<https://secure.dbi.udel.edu/registration/microarray.cgi>

Registration Deadline is December 20th, 2005

DNA microarray technology is a powerful analytical tool used largely for the experimental exploration of differential gene expression, and with emerging applications in genotyping, pharmacology, diagnostics, forensics, toxicology and more. This hands-on workshop will lead participants through the process of designing and manufacturing custom DNA microarrays on glass slides, using state-of-the-art robotics. This is an entry-level course, designed to introduce participants to the underlying technology and to provide laboratory experience with microarray production.

REGISTRATION

The workshop is open to faculty, staff and students interested in DNA microarray technology. However space is limited to eight participants. Register today by going to: <https://secure.dbi.udel.edu/registration/microarray.cgi> or download and complete the registration form attached, and then fax it to 302-831-4841. The deadline for registration is December 20, 2005.

COST

The cost is \$125 per person. The registration fee will cover expenses for all instruction, laboratory supplies, use of equipment and handouts. Lunch is included on both days. INBRE or EPSCoR participants may request that the cost be covered under these grants.
